THAT Ridgely movement in Springfield eems to hurt the Democrats, else why do they squeal so. The Review rears up and calls Mr. Ridgely all sorts of names, finally coming to the conclusion that the party is better off without him. If that is so, what is the use of making so much fuss over his going? People do not generally exhibit so much anger when they feel good.

Crops in Illinois.

Corn.—The weather during the past two weeks has been favorable for ripening corn, which is maturing rapidly and is safe from sensible forsts. The light frests to date have not injured the late corn much, which promises to make an average yield per arre. The large area 17,03,00 aerest of growing corn in this state promises to make an average yield per area, the many sections of the state the average yield per acre of corn will be the largest on record.

PASTCINES. The condition of grass fands in the central and southern counties is fully up to a seasonable average. In the northern division of the state pasturage is short and the complaints of drouth are quite frequent.

FRUIT.—The crop of apples, peaches, etc.,

## "HOME COMFORT" FURNACES.

Malleable Iron, Very Little Fuel, No Leaky Joints.

No one can say that the time was not ripe for a new furnace. The days of brittle, porous, cast iron furnaces are numbered. In ever branch of manufacture east iron is being driven out by wrought iron and steel. Every bridge that goes down in a wreck of lives and property is found to have cast iron members. Every bursting cannon which slays its friends rather than its enemies is made of east iron. Every leaky furnace which poisons a household with its noisome gases is found to be made of the same cheap, unreliable material. Improved methods of manufacture have made steel and iron plate, of first quality, less expensive than cast iron formerly was, and it is plainly in accord with progress in other directions that there should be progress both in design and the material of furnaces for warming our homes, churches and schools.
